ForeAccumulation II

Single Premium Fixed Index Annuity
Hypothetical Illustration: Introduction

What is this document?

This is an illustration intended to help you understand how your fixed index annuity Contract works. It is not intended to predict performance and is not a guarantee of future performance. It depicts how the Contract will perform and respond under certain assumptions that may or may not come true.

This is not a fixed index annuity contract.

About ForeAccumulation II Fixed Index Annuity

The ForeAccumulation II fixed index annuity is designed to help you prepare for retirement by offering protection for your money without the erratic ups and downs of the stock market. It also offers potential for greater interest crediting than traditional interest accounts may offer. A fixed index annuity is intended for retirement or other long-term needs. It is intended for a person who has sufficient cash or other liquid assets for living expenses and other unexpected emergencies, such as medical expenses. A fixed index annuity is not a registered security or stock market investment and does not directly participate in any stock or equity investments or index.

Guarantees provided are subject to the financial strength of the issuing insurance company; not guaranteed by any bank or the FDIC. Death benefits may be subject to ordinary income taxes, and may be included in the contract owner's gross estate for estate tax purposes.

Where to find additional product information

In addition to the Disclosure Document, you can find more information about ForeAccumulation II in the product kit. The kit contains a product brochure and product details sheet, which describe the product features and benefits.

These materials are interdependent and together will give you a more complete picture of the benefits of ForeAccumulation II, as well as the associated risks, costs and tradeoffs.

About Global Atlantic

Global Atlantic Financial Group is a leading insurance company meeting the retirement and life insurance needs of individuals and institutions. With a strong financial foundation and risk and investment management expertise, the company delivers tailored solutions to create more secure financial futures. The company's performance has been driven by its culture and core values focused on integrity, teamwork, and the importance of building long-term client relationships. Global Atlantic is a majority-owned subsidiary of KKR, a leading global investment firm. Through its relationship, the company leverages KKR's investment capabilities, scale, and access to capital markets to enhance the value it offers clients. KKR's parent company is KKR & Co. Inc. (NYSE: KKR)

This illustration is accompanied by our Disclosure Document. The Disclosure Document contains information regarding the fixed index annuity contract, which should be considered carefully before purchasing. Please read the Disclosure Document carefully before purchasing.

For a list of key terms, please see the Key Terms and Definitions section.

THIS IS AN ILLUSTRATION ONLY. AN ILLUSTRATION IS NOT INTENDED TO PREDICT ACTUAL PERFORMANCE. INTEREST RATES, DIVIDENDS, OR VALUES THAT ARE SET FORTH IN THE ILLUSTRATION ARE NOT GUARANTEED, EXCEPT FOR THOSE ITEMS CLEARLY LABELED AS GUARANTEED.

This material was prepared to support the promotion and marketing of annuity products issued by Forethought Life Insurance Company. Illustrations included in this material are based on the information and assumptions that you and your financial professional discussed, and do not reflect any suggestion, recommendation, or advice by Forethought or any Global Atlantic companies for you, your contract and/or investment situation.

ForeAccumulation II

Single Premium Fixed Index Annuity

Hypothetical Illustration: Snapshot

Client Name:	Valued Client	Premium:	\$100,000	Withdrawal Charge Period:	10 Year
Gender/Issue Age/State of Issue:	Male/65/WA	Tax Status:	Non-Qualified	Optional Benefits:	Optional Premium Enhancement

This hypothetical illustration is based on the following allocation percentages. Rates are current as of the date of this illustration:

Strategy	Allocation	Rates/Caps/Spreads			Assumed Index Growth Rate ¹					
		Current	Guaranteed		Most Recent 10		Highest 10		Lowest 10	
			During Withdrawal Charge Period	After Withdrawal Charge Period	Period	Annualized Index Return	Period	Annualized Index Return	Period	Annualized Index Return
Franklin ² One Year Point-to-Point with Participation Rate	33%	120.00%	10.00%	10.00%	2014-2023	4.49%	2010-2019	9.13%	2014-2023	4.49%
J.P. Morgan Cross-Asset Strategy ³ One Year Point-to-Point with Participation Rate	34%	120.00%	10.00%	10.00%	2014-2023	5.41%	2004-2013	10.16%	2014-2023	5.41%
PIMCO ⁴ One Year Point-to-Point with Participation Rate	33%	150.00%	10.00%	10.00%	2014-2023	2.76%	2010-2019	5.90%	2014-2023	2.76%

Withdrawal Charge Schedule											
Contract Year	1	2	3	4	5	6	7	8	9	10	11+
Withdrawal Charge %	9%	9%	8%	7%	6%	5%	4%	3%	2%	1%	0%

Optional Premium Enhancement Rider		
Premium Enhancement Percentage	12.00%	
Premium Enhancement Amount	\$12,000	
	Contract Year	Premium Enhancement Recapture %
	1	100%
	2	100%
	3	90%
Premium Enhancement Recapture Charge Schedule	4	80%
	5	70%
	6	60%
	7	50%
	8	35%
	9	25%
	10	10%
	11+	0%

This is an optional benefit which provides for a premium enhancement equal to the premium paid multiplied by the Premium Enhancement Percentage shown on the Contract Data Page. The Premium Enhancement will be credited to the Strategies on the Issue Date based on the Allocation Percentages selected. The amount of the Premium Enhancement is not considered a premium payment but is considered part of interest credited.

Contracts with a Premium Enhancement Rider will result in lower crediting rates, caps, participation rates, trigger rates and higher spreads than in comparison to contracts without a Premium Enhancement Rider. These lower caps, participation rates, trigger rates and higher spreads may result in less interest accumulated in the contract than in a contract without a Premium Enhancement Rider. Premium Enhancement Rider may not be appropriate for all contract holders; speak with your financial professional to help you determine if this Enhancement is suitable and in your best interest. There is no guarantee that electing this Rider will result in a higher contract value at the end of the contract. This Rider is not available with other optional riders, such as, but not limited to: Enhanced Death Benefit or Growth Accelerator Riders.

A Premium Enhancement Recapture Charge will be assessed on any cumulative withdrawals that exceed the Free Withdrawal Amount, to any annuitization during the first Contract Year, and to Death Benefits during the first contract year, proportionally adjusted to reflect the amount of the Premium Enhancement withdrawn, following the Premium Enhancement Recapture Charge Schedule. Additionally, a Withdrawal Charge (as outlined in the Withdrawal Charge Schedule) and, if applicable, a Market Value Adjustment will be assessed on the remaining portion of the withdrawal in excess of the Free Withdrawal Amount.

The current rates/caps/spreads referenced above are guaranteed for the initial Strategy Term. After the initial Strategy Term expires, renewal interest rates/caps/spreads will be declared and will never be less than the guaranteed rates/caps/spreads shown above. For the indexed-linked options with caps, the caps shown above are used to determine the maximum amount of interest you could receive at the end of a Strategy Term if the index performance is positive. If the index performance is negative, no interest will be credited at the end of that Strategy Term. In the event the rate/cap/spread for any eligible strategy, as described in the Withdrawal Charge Waiver Rider, is set at a renewal rate below (or above for spread-based strategies) the bailout rate (Withdrawal Charge Waiver Rate) for that strategy, withdrawals will be permitted free of Withdrawal Charges, Premium Enhancement Recapture Charge, and Market Value Adjustment, if applicable. If in a subsequent year the rates/caps/spreads for all eligible strategies are set at renewal rates at or above (below for spread-based strategies) the bailout rates for those strategies, Withdrawal Charges, Premium Enhancement Recapture Charge, and Market Value Adjustment will apply again, as applicable.

Single Premium Fixed Index Annuity

Hypothetical Illustration: Snapshot

Client Name:	Valued Client	Premium:	\$100,000	Withdrawal Charge Period:	10 Year
Gender/Issue Age/State of Issue:	Male/65/WA	Tax Status:	Non-Qualified	Optional Benefits:	Optional Premium Enhancement

This illustration assumes the index will repeat historical performance and, in some instances, that the annuity's current non-guaranteed elements, such as caps, spreads, participation rates or other interest crediting adjustments, will not change. It is likely that the index **will not** repeat historical performance, the non-guaranteed elements **will** change, and actual values will be higher or lower than those in this illustration but will not be less than the minimum guarantees.

The values in this illustration are **not** guarantees or even estimates of the amounts you can expect from your annuity. Please review the entire attached Disclosure Document and Buyer's Guide provided with your Annuity Contract for more detailed information.

Withdrawals are assumed to take place at the beginning of the contract year. Contract Value and Guaranteed Death Benefit are the values available at the beginning of the following contract year.

¹ The index growth rates shown ignore the index strategy rate calculations, and show growth in the index only.

² **Important Information Regarding Hypothetical Historical (Back-Tested) Performance of the Franklin US Index:** Hypothetical historical performance of the Franklin US Index is not an indication of future results. Back-tested performance is not actual historical performance, but is hypothetical. The back-tested calculations are based on the methodology in effect on November 13, 2017. The Franklin US Index was officially launched on November 13, 2017. Actual live index historical performance for 11/13/2017 - 12/31/2023 reflects the Index methodology in place during that time period. Prospective application of the methodology used to construct the Franklin US Index may not result in performance commensurate with the back-test returns shown. The back-tested period does not necessarily correspond to the entire available history of the Index.

Another limitation of back-tested hypothetical information is that generally the back-tested calculation is prepared with the benefit of hindsight. Back-tested data reflects the application of the Index methodology and selection of Index constituents in hindsight. No hypothetical record can completely account for the impact of financial risk in actual trading. For example, there are numerous factors related to the equities markets in general which cannot be, and have not been, accounted for in the preparation of the index information set forth, all of which can affect actual performance.

It is not possible to invest directly in the Franklin US Index. The hypothetical historical performance data, however does not reflect any additional costs or fees that may be paid in connection with any security linked to the Index. In addition, the performance data does not reflect any additional fees that may be paid by counterparty to a transaction referencing the Franklin US Index, and which may be agreed between Franklin Templeton ("Franklin") and the counterparty.

The following illustrations reflect the pre-inception performance data of the Franklin US Index based on hypothetical back-tested closing levels from 12/31/2003 through 11/12/2017 and the post-inception, actual live index historical performance data of the Franklin US Index based on closing levels from 11/13/2017 through 12/31/2023. These two calculation methods collectively comprise the hypothetical Franklin US Index results that then reflect the interest that Forethought would have credited for the product after applying a cap/participation rate/spread, as applicable, for the time period indicated. Returns are annualized for calculation purposes for the time periods indicated, however annualized returns are not actual historical returns and are not returns that a client would actually receive.

HYPOTHETICAL HISTORICAL DATA IS NO GUARANTEE OF FUTURE RESULTS. YOUR RESULTS WILL VARY BASED ON ACTUAL INDEX PERFORMANCE, INDEX ALLOCATIONS AND RATES APPLIED TO THE CONTRACT.

³ **Important Information Regarding Hypothetical Historical (Back-Tested) Performance of the J.P. Morgan Cross-Asset Strategy Index:** Hypothetical historical performance of the J.P. Morgan Cross-Asset Strategy Index is not an indication of future results. Back-tested performance is not actual historical performance, but is hypothetical. The back-tested calculations are based on the methodology in effect on June 12, 2023. Actual live index historical performance for 6/12/2023 through 12/31/2023 reflects the Index methodology in place during that time period. Prospective application of the methodology used to construct the J.P. Morgan Cross-Asset Strategy Index may not result in performance commensurate with the back-test returns shown. The back-tested period does not necessarily correspond to the entire available history of the Index.

Another limitation of back-tested hypothetical information is that generally the back-tested calculation is prepared with the benefit of hindsight. Back-tested data reflects the application of the Index methodology and selection of Index constituents in hindsight. No hypothetical record can completely account for the impact of financial risk in actual trading. For example, there are numerous factors related to the equities and fixed income markets in general which cannot be, and have not been, accounted for in the preparation of the index information set forth, all of which can affect actual performance.

It is not possible to invest directly in the J.P. Morgan Cross-Asset Strategy Index. The hypothetical historical performance data, however does not reflect any additional costs or fees that may be paid in connection with any security linked to the Index. In addition, the performance data does not reflect any additional fees that may be paid by counterparty to a transaction referencing the J.P. Morgan Cross-Asset Strategy Index, and which may be agreed between J.P. Morgan and the counterparty.

Client Name:	Valued Client	Premium:	\$100,000	Withdrawal Charge Period:	10 Year
Gender/Issue Age/State of Issue:	Male/65/WA	Tax Status:	Non-Qualified	Optional Benefits:	Optional Premium Enhancement

The following illustrations reflect the pre-inception performance data of the J.P. Morgan Cross-Asset Strategy Index based on closing levels from 12/31/2002 through 6/11/2023 and the post-inception, actual live index historical performance data of the J.P. Morgan Cross-Asset Strategy Index based on closing levels from 6/12/2023 through 12/31/2023. These two calculation methods collectively comprises the hypothetical J.P. Morgan Cross-Asset Strategy Index results that then reflect the interest that Forethought would have credited for the product after applying a cap/participation rate/spread, as applicable, for the time period indicated. Returns are annualized for calculation purposes for the time periods indicated, however annualized returns are not actual historical returns and are not returns that a client would actually receive.

HYPOTHETICAL HISTORICAL DATA IS NO GUARANTEE OF FUTURE RESULTS. YOUR RESULTS WILL VARY BASED ON ACTUAL INDEX PERFORMANCE, INDEX ALLOCATIONS AND RATES APPLIED TO THE CONTRACT.

⁴ **Important Information Regarding Hypothetical Historical (Back-Tested) Performance of the PIMCO Balanced Index:** Hypothetical historical performance of the PIMCO Balanced Index is not an indication of future results. Back-tested performance is not actual historical performance, but is hypothetical. The back-tested calculations are based on the methodology in effect on November 30, 2017. The PIMCO Balanced Index was officially launched on November 30, 2017. Actual live index historical performance for 11/30/2017 - 12/31/2023 reflects the Index methodology in place during that time period. Prospective application of the methodology used to construct the PIMCO Balanced Index may not result in performance commensurate with the back-test returns shown. The back-tested period does not necessarily correspond to the entire available history of the Index.

Another limitation of back-tested hypothetical information is that generally the back-tested calculation is prepared with the benefit of hindsight. Back-tested data reflects the application of the Index methodology and selection of Index constituents in hindsight. No hypothetical record can completely account for the impact of financial risk in actual trading. For example, there are numerous factors related to the equities and fixed income markets in general which cannot be, and have not been, accounted for in the preparation of the index information set forth, all of which can affect actual performance.

It is not possible to invest directly in the PIMCO Balanced Index. The hypothetical historical performance data, however does not reflect any additional costs or fees that may be paid in connection with any security linked to the Index. In addition, the performance data does not reflect any additional fees that may be paid by counterparty to a transaction referencing the PIMCO Balanced Index, and which may be agreed between Pacific Investment Management Company LLC ("PIMCO") and the counterparty.

The following illustrations reflect the pre-inception performance data of the PIMCO Balanced Index based on hypothetical back-tested closing levels from 12/31/2002 through 11/29/2017 and the post-inception, actual live index historical performance data of the PIMCO Balanced Index based on closing levels from 11/30/2017 through 12/31/2023. These two calculation methods collectively comprise the hypothetical PIMCO Balanced Index results that then reflect the interest that Forethought would have credited for the product after applying a cap/participation rate/spread, as applicable, for the time period indicated. Returns are annualized for calculation purposes for the time periods indicated, however annualized returns are not actual historical returns and are not returns that a client would actually receive.

HYPOTHETICAL HISTORICAL DATA IS NO GUARANTEE OF FUTURE RESULTS. YOUR RESULTS WILL VARY BASED ON ACTUAL INDEX PERFORMANCE, INDEX ALLOCATIONS AND RATES APPLIED TO THE CONTRACT.

Aggregate Annual Effective Interest Rate (first 10 years)								7.45%

This hypothetical chart represents the interest credited to the hypothetical Contract Values on the Most Recent 10 Years with Current Rates/Caps/Spreads portion of this illustration. It reflects historical index performance for the last 10 calendar years, repeating every 10 years, for each of the elected strategies and the corresponding indices. It assumes that the current, non-guaranteed rates/caps/spreads indicated on page 3 of this illustration will not change. Actual results may be higher or lower. For guaranteed elements, please refer to the Guaranteed Values portion of this illustration.

** Interest rates do not reflect rider charge deductions. *** These indices are not available for direct investing.

ForeAccumulation II

Single Premium Fixed Index Annuity

Hypothetical Illustration: Market Value Adjustment Example

Client Name:	Valued Client	Premium:	\$100,000	Withdrawal Charge Period:	10 Year
Gender/Issue Age/State of Issue:	Male/65/WA	Tax Status:	Non-Qualified	Optional Benefits:	Optional Premium Enhancement

When you make a withdrawal the amount you receive may be increased or decreased by a Market Value Adjustment (MVA). If interest rates on which the MVA is based go up after you buy your annuity, the MVA likely will decrease the amount you receive. If interest rates go down, the MVA will likely increase the amount you receive.

A Market Value Adjustment is applied only during the withdrawal charge period to both full withdrawals and to partial withdrawals in excess of the Free Withdrawal Amount. A MVA does not apply upon the death of an owner.

The graphs below show MVA-adjusted Surrender Values (SV) during the first 10 years of the contract under the same assumptions as illustrated on the Guaranteed Values and Most Recent 10 Years with Current Rates/Caps/Spreads portions of your illustration. The green line indicates the most that the MVA will increase the amount you can receive. If the MVA reference rate* does not change, the blue line shows the Surrender Values. The red line indicates the most that the MVA will decrease the amount you can receive.

* The "MVA reference rate" on any date is equal to the "Total Composite Yield-to-Worst of the Dow Jones Corporate Bond IndexSM" two business days before that date. The Dow Jones Corporate Bond IndexSM measures the return of readily tradable, high-grade U.S. corporate bonds and is priced daily. This index is not available for direct investing.

** Values are calculated without consideration to the bailout provision.

Life Annuity with Cash Refund

Life Annuity with 10 Years of Annuity Payments Guaranteed

Joint and Last Survivor Annuity

Joint and Last Survivor Annuity with 10 Years of Annuity Payments Guaranteed

Guaranteed Payment Period

Hypothetical Annuity Income Illustration

The following hypothetical annuity income quotes are based on annuitization taking place at the later of age 70 or 10 years after issue and at the maturity date. The maturity date is the contract anniversary on or immediately following the oldest owner's 95th birthday, however, clients may elect to annuitize at any time following the first contract anniversary *.

Annuity Income Options Based on Rates Guaranteed in the Contract and Guaranteed Elements

Annuity Income Option	Assumed Owner Age when Payments Start / Gender	Surrender Value*	Based on Rates Guaranteed in the Contract	
			Monthly Annuity Income Rate Per \$1,000 of Account Value**	Monthly Annuity Income
Life Annuity with 10 Years of Annuity Payments Guaranteed	75/M	\$110,020	\$4.96	\$546
Life Annuity with 10 Years of Annuity Payments Guaranteed	95/M	\$158,494	\$8.14	\$1,290

Annuity Income Options Based on Rates Guaranteed in the Contract and Non-Guaranteed Elements

Annuity Income Option	Assumed Owner Age when Payments Start / Gender	Surrender Value*	Based on Rates Guaranteed in the Contract	
			Monthly Annuity Income Rate Per \$1,000 of Account Value**	Monthly Annuity Income
Life Annuity with 10 Years of Annuity Payments Guaranteed	75/M	\$225,771	\$4.96	\$1,120
Life Annuity with 10 Years of Annuity Payments Guaranteed	95/M	\$986,109	\$8.14	\$8,027

Surrender Values utilized for Guaranteed Element income options can be located on the Guaranteed Values portion of your illustration while Surrender Values utilized for Non-Guaranteed Element income options can be located on the Most Recent 10 Years with Current Rates/Caps/Spreads portion of your illustration.

* State variations may apply

** If, at the time of annuitization, the annuity income rates currently offered by Forethought Life Insurance Company (FLIC) to this class of contracts are higher than the annuity income rates guaranteed in the contract, those current rates will apply.

Hypothetical Illustration: Indices & Crediting Strategies

Crediting Strategies*	Indices
<p>One Year Point-to-Point with Participation Rate</p> <p>Interest is credited annually based on a comparison of the Franklin US index value at the start of the period to the index value after one year to determine a percentage change. You do not invest directly in the Franklin US Index. No crediting or calculations are done during the year. Interest credit is based on index performance and:</p> <ul style="list-style-type: none"> • The participation rate is multiplied by the percentage change of the index to determine the percentage of the interest that is credited to the fixed index annuity. • No interest will be credited if the index performance is zero or negative 	<p>Franklin US Index¹</p> <p>Investors who are looking for equity exposure to large-cap U.S. companies (generally those with a market cap of more than \$10 billion) for portfolio diversification may be interested in the Franklin US Index. The index is comprised of the LibertyQ US Large Cap Index, S&P 10YR Treasury Futures Index, S&P 5YR Treasury Futures Index and cash with target risk of 7%. The Franklin US Index is focused on maximizing equity exposure, using stocks whenever possible. It offers four strategies to maximize growth potential and manage risk:</p> <ul style="list-style-type: none"> • An equity component designed to outpace traditional market-cap weighted index strategies • Duration risk is managed with a fixed income component that dynamically responds to 10-year Treasury note interest rate movements. • Management of equity risk by including more equity when volatility is low and less equity when volatility is high • Management of volatility risk through use of cash when combined volatility of markets exceeds the 7% target risk <p>There can be no assurance that implementation of managed volatility strategies will produce desired results. In addition, the target volatility strategy could limit the index performance in rising markets and may expose the index to costs to which it would otherwise not have been exposed.</p> <p>The Franklin US Index is an excess return index. Prior to December 3, 2021 the Index levels represent performance in excess of the 3-month US Dollar LIBOR rate. From December 3, 2021 on, the Index levels represent performance in excess of the United States SOFR Secured Overnight Financing Rate plus a constant adjustment of +26 bps.</p>
<p>One Year Point-to-Point with Participation Rate</p> <p>Interest is credited annually based on a comparison of the J.P. Morgan Cross-Asset Strategy index value at the start of the period to the index value after one year to determine a percentage change. You do not invest directly in the J.P. Morgan Cross-Asset Strategy Index. No crediting or calculations are done during the year. Interest credit is based on index performance and:</p> <ul style="list-style-type: none"> • The participation rate is multiplied by the percentage change of the index to determine the percentage of the interest that is credited to the fixed index annuity. • No interest will be credited if the index performance is zero or negative 	<p>J.P. Morgan Cross-Asset Strategy Index²</p> <p>The J.P. Morgan Cross-Asset Strategy Index is a rules-based, multi-asset index that uses ETFs, futures and indices to provide exposure to equities, fixed income, real assets, and commodities. The index dynamically allocates across these assets based on their recent performance and risk, as well as other factors such as price momentum, while attempting to achieve a level volatility over time.</p>

Hypothetical Illustration: Indices & Crediting Strategies

Crediting Strategies*	Indices
<p>One Year Point-to-Point with Participation Rate</p> <p>Interest is credited annually based on a comparison of the PIMCO Balanced index value at the start of the period to the index value after one year to determine a percentage change. You do not invest directly in the PIMCO Balanced Index. No crediting or calculations are done during the year. Interest credit is based on index performance and:</p> <ul style="list-style-type: none">• The participation rate is multiplied by the percentage change of the index to determine the percentage of the interest that is credited to the fixed index annuity.• No interest will be credited if the index performance is zero or negative	<p>PIMCO Balanced Index³</p> <p>The PIMCO Balanced Index is a quantitative, rules-based index that dynamically allocates across U.S. equity and bond markets. The index is designed to provide three powerful benefits:</p> <ol style="list-style-type: none">1. Allocate to broad, well-known markets2. Capture upside while managing downside3. Navigate changing equity and bond markets <p>The Index allocates to U.S. large cap equities, U.S. fixed income, and cash. Weights are rebalanced daily based on two mechanisms aimed at navigating changing equity and bond markets:</p> <ol style="list-style-type: none">1. Capitalizing on interest rate trends: Determine mix of treasury futures and cash within the bond allocation<ul style="list-style-type: none">• As interest rates trend higher and bond prices fall, the Index targets lower treasury futures exposure with the potential to take a short position that can enhance returns• When interest rates are declining or remain flat, the Index targets 100% to treasury futures2. Adjusting equity and bond allocation based on market volatility<ul style="list-style-type: none">• The Index can allocate up to 100% in equities during periods of low volatility• As market volatility increases, the allocation to equities decreases in favor of the bond allocation in order to stabilize risk and potentially mitigate losses <p>There can be no assurance that implementation of managed volatility strategies will produce desired results. In addition, the target volatility strategy could limit the index performance in rising markets and may expose the index to costs to which it would otherwise not have been exposed.</p> <p>The PIMCO Balanced Index is an excess return index. The index levels represent performance in excess of the Secured Overnight Financing Rate (SOFR) + 0.2616%.</p>

*Additional strategies may be available. Please refer to the Disclosure Document and product kit for details.

Please note that interest crediting strategies are subject to state availability and may not be available through all financial intermediaries.

¹ **Important Information Regarding Hypothetical Historical (Back-Tested) Performance of the Franklin US Index:** Hypothetical historical performance of the Franklin US Index is not an indication of future results. Back-tested performance is not actual historical performance, but is hypothetical. The back-tested calculations are based on the methodology in effect on November 13, 2017. The Franklin US Index was officially launched on November 13, 2017. Actual live index historical performance for 11/13/2017 - 12/31/2023 reflects the Index methodology in place during that time period. Prospective application of the methodology used to construct the Franklin US Index may not result in performance commensurate with the back-test returns shown. The back-tested period does not necessarily correspond to the entire available history of the Index.

Another limitation of back-tested hypothetical information is that generally the back-tested calculation is prepared with the benefit of hindsight. Back-tested data reflects the application of the Index methodology and selection of Index constituents in hindsight. No hypothetical record can completely account for the impact of financial risk in actual trading. For example, there are numerous factors related to the equities markets in general which cannot be, and have not been, accounted for in the preparation of the index information set forth, all of which can affect actual performance.

Hypothetical Illustration: Key Terms and Definitions

Age

Attained age at the beginning and end of each Contract Year for the Contract Owner(s), or Annuitant in the case of non-natural ownership.

Aggregate Credited Rate

The cumulative growth rate of all elected investment strategies over the period of one Contract Year.

Bailout (Withdrawal Charge Waiver Rider)

The Contract Value may be withdrawn with no Withdrawal Charges or MVA if after the Initial Strategy Term expires the renewal rates/caps/spreads are set at rates below (above for spread-based strategies) the Bailout Rate (Withdrawal Charge Waiver Rate).

Contract Value

The Contract Value is the sum of Indexed Strategy value(s) and the One-Year Fixed Strategy value.

Contract Year

A one-year period starting on the illustration effective date and on each Contract Anniversary thereafter.

Cumulative Withdrawals

Total withdrawals from contract issue up to and including the beginning of the Contract Year.

Guaranteed Death Benefit

The amount We will pay upon the death of the Owner, or first death of an Owner in the case of joint Owners. In the case of a non-natural owner, the Guaranteed Death Benefit is payable upon the death of the Annuitant.

Interest Credited Amount

The amount of interest added to the Contract Value.

Market Value Adjustment (MVA)

Applies during the withdrawal charge period on withdrawals in excess of the free partial withdrawal amount. The MVA also applies to annuitization during the withdrawal charge period, even though no withdrawal charges would apply. MVAs are not applicable in all states.

Optional Premium Enhancement

This is an optional benefit which provides for a premium enhancement equal to the premium paid multiplied by the Premium Enhancement Percentage. The Premium Enhancement will be credited to the Strategies on the Issue Date based on the Allocation Percentages selected. The amount of the Premium Enhancement is not considered a premium payment but is considered part of interest credited. The Optional Premium Enhancement will result in lower crediting rates, caps, participation rates, trigger rates, and higher spreads for the contract's Crediting Strategies in comparison to contracts that do not benefit from Premium Enhancements. These lower crediting rates, caps, participation rates, trigger rates, and higher spreads may result in less interest accumulated in the contract than a contract without a Premium Enhancement Rider. A Premium Enhancement Rider may not be appropriate for all contract holders; speak with your financial professional to help you determine if this option is suitable and in your best interest.

Premium Enhancement Recapture Charge

A Premium Enhancement Recapture Charge will be assessed on any cumulative withdrawals that exceed the Free Withdrawal Amount, to any annuitization during the first Contract Year, and to Death Benefits during the first Contract Year, proportionally adjusted to reflect the amount of the Premium Enhancement withdrawn, following the Premium Enhancement Charge Schedule (found on page 3 of this illustration and in the Product Disclosure).

Surrender Value

The greater of:

1. the Contract Value less any applicable Withdrawal Charges, after any applicable Market Value Adjustment and less any applicable premium taxes; or
2. the Minimum Nonforfeiture Amount.

Withdrawals

Any withdrawal of a portion of your Contract Value. May be subject to charges if applicable.

ForeAccumulation II

Single Premium Fixed Index Annuity

Hypothetical Illustration: Important Information

Global Atlantic Financial Group (Global Atlantic) is the marketing name for The Global Atlantic Financial Group LLC and its subsidiaries, including Accordia Life and Annuity Company, Commonwealth Annuity and Life Insurance Company, Forethought Life Insurance Company and Global Atlantic Re Limited. Each subsidiary is responsible for its own financial and contractual obligations. These subsidiaries are not authorized to do business in New York.

ForeAccumulation II fixed index annuity is issued by Forethought Life Insurance Company, 10 West Market Street, Suite 2300, Indianapolis, Indiana. Forethought Life Insurance Company is a subsidiary of Global Atlantic Financial Group Limited. Available in most states with contract ICC17-FA1801SPDA-01 and FA1801SPDA-01.

Guarantees provided are subject to the financial strength of the issuing insurance company; not guaranteed by any bank or the FDIC.

Products and features are subject to state availability and variations. Read the Contract for complete details.

A fixed index annuity is intended for retirement or other long-term needs. It is intended for a person who has sufficient cash or other liquid assets for living expenses and other unexpected emergencies, such as medical expenses. A fixed index annuity is not a registered security or stock market investment and does not directly participate in any stock or equity investments or index.

This information is written in connection with the promotion or marketing of the matter(s) addressed in this material. The information cannot be used or relied upon for the purpose of avoiding IRS penalties. These materials are not intended to provide tax, accounting or legal advice. As with all matters of a tax or legal nature, you should consult a tax or legal counsel for advice. Taxable distributions (including certain deemed distributions) are subject to ordinary income taxes, and if made prior to age 59½, may also be subject to a 10% federal income tax penalty. Payments from IRAs are taxable in accordance with the normal rules surrounding taxation of payments from an IRA. Early surrender charges may also apply. Withdrawals will reduce the death benefit and any optional guaranteed amounts in an amount more than the actual withdrawal. If you are investing in a fixed index annuity through a tax-advantaged retirement plan such as an IRA, you will receive no additional tax advantage from a fixed index annuity. Under these circumstances, you should only consider buying a fixed index annuity if it makes sense because of the annuity's other features, such as lifetime income payments and death benefit protection.

Unless you have chosen to illustrate with Required Minimum Distributions(RMDs), this Illustration does not take into consideration the potential withdrawal of RMDs that may be associated with a contract issued as a traditional Individual Retirement Account ("IRA"). If you choose to illustrate RMDs, please note that the illustrated RMD amounts are an estimate only and will likely differ from your actual RMD amounts for each year. As an IRA owner, your actual RMD is calculated by dividing the contract value of the annuity contract as of the last day of the preceding year by life expectancy factors taken from the IRS Uniform Lifetime Table using your attained age in the distribution calendar year. This is different from the illustration which uses an estimated account value as of the contract anniversary date and your stated current age to estimate the RMD amounts. In some circumstances, the value of the contract for purposes of calculating RMDs includes the actuarial present value of all contract and rider benefits, such as guaranteed withdrawal and death benefits. Any withdrawals, including RMDs, may reduce the actuarial present value of the living and/or death benefit guarantees on a contract by more than the dollar amount of the withdrawal. This can result in the significant reduction of the living and/or death benefit guarantees remaining in the contract. RMDs must begin no later than April 1 of the year following the IRA owners attainment of age 73. Failure to take RMDs may result in a 50% penalty, known as an IRS Excess Accumulation Penalty, on the amount of required distribution not taken, and the penalty does not relieve the Owner of the responsibility to withdraw the required amount for that year. No RMD is required during the lifetime of the Owner of a Roth IRA. Distributions from one IRA may be able to satisfy the RMDs associated with another IRA, however only RMDs resulting from the contract value of the annuity contract may receive treatment as a non-excess withdrawal. This illustration assumes that any RMD for the year the account is opened has been satisfied prior to the account being opened or is being withdrawn from another IRA you own. Additionally, the RMDs shown are estimates and should not be relied upon in determining actual RMD obligations. Please consult with an attorney, financial professional, or qualified tax advisor concerning these matters.

The Franklin US Index (the "Index") is owned by Franklin Templeton ("Franklin"), is calculated and maintained by S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices, LLC) and is licensed for use by Forethought Life Insurance Company ("Forethought"). Single Premium Fixed Index Annuity

Hypothetical Illustration: Important Information

The J.P. Morgan Cross-Asset Strategy Index ("Index") has been licensed to Forethought Life Insurance Company ("**Licensee**") for use in connection with its Fixed Indexed Annuity (together and individually the "**Annuity Product**"). Neither the Licensee nor the Annuity Product is sponsored, operated, endorsed, sold, or promoted by J.P. Morgan Securities LLC or any of its affiliates (together and individually, "**J.P. Morgan**"). J.P. Morgan makes no representation and no warranty, express or implied, to purchasers of the Annuity Product (or any person taking exposure to it) or any member of the public in any other circumstances (each, a "**Purchaser**"): (a) regarding the advisability of investing in or purchasing securities or other financial or insurance products generally or in the Annuity Product particularly; or (b) the suitability or appropriateness of an exposure to the Index in seeking to achieve any particular objective. It is for those taking an exposure to the Annuity Product and/or the Index to satisfy themselves of these matters and such persons should seek appropriate professional advice before purchasing insurance. J.P. Morgan is not responsible for and does not have any obligation or liability in connection with the issuance, administration, marketing, or trading of the Annuity Product. The publication of the Index and the referencing of any asset or other factor of any kind in the Index do not constitute any form of investment recommendation or advice in respect of any such asset or other factor by J.P. Morgan and no person should rely upon it as such. J.P. Morgan does not act as an investment adviser or investment manager in respect of the Index or the Annuity Product and do not accept any fiduciary duties in relation to the Index, the Annuity Product, or any Purchaser.

The Index has been designed by J.P. Morgan, and is compiled, calculated, maintained, and sponsored by J.P. Morgan without regard to the Licensee, the Annuity Product, or any Purchaser. The ability of the Licensee to make use of the Index may be terminated on short notice and it is the responsibility of the Licensee to provide for the consequences of that in the design of the Annuity Product. J.P. Morgan does not accept any legal obligation to take the needs of any person who may invest in an Annuity Product into account in designing, compiling, calculating, maintaining, or sponsoring the Index or in any decision to cease doing so.

J.P. Morgan does not give any representation, warranty or undertaking, of any type (whether express or implied, statutory or otherwise) in relation to the Index, as to condition, satisfactory quality, performance or fitness for purpose or as to the results to be achieved by an investment in the Annuity Product or any data included in or omissions from the Index, or the use of the Index in connection with the Annuity Product or the veracity, currency, completeness or accuracy of the information on which the Index is based (and without limitation, J.P. Morgan accepts no liability to any Purchaser for any errors or omissions in that information or the results of any interruption to it, and J.P. Morgan shall be under no obligation to advise any person of any such error, omission or interruption). To the extent any such representation, warranty or undertaking could be deemed to have been given by J.P. Morgan, it is excluded save to the extent that such exclusion is prohibited by law. To the fullest extent permitted by law, J.P. Morgan shall have no liability or responsibility to any person or entity (including, without limitation, to any Purchasers) for any losses, damages, costs, charges, expenses or other liabilities howsoever arising, including, without limitation, liability for any special, punitive, indirect or consequential damages (including loss of business or loss of profit, loss of time and loss of goodwill), even if notified of the possibility of the same, arising in connection with the design, compilation, calculation, maintenance or sponsoring of the Index or in connection with the Annuity Product.

The Index is the exclusive property of J.P. Morgan. It is compiled, calculated, maintained, and sponsored by J.P. Morgan. J.P. Morgan is under no obligation to continue compiling, calculating, maintaining, or sponsoring the Index and may delegate or transfer to a third party some or all of its functions in relation to the Index.

J.P. Morgan may independently issue or sponsor other indices or products that are similar to and may compete with the Index and the Annuity Product. J.P. Morgan may also transact in assets referenced in the Index (or in financial instruments such as derivatives that reference those assets). It is possible that these activities could have an effect (positive or negative) on the value of the Index and the Annuity Product.

No actual investment which allowed tracking of the performance of the Index was possible before June 12, 2023. Any hypothetical "back-tested" information provided herein is illustrative only and derived from proprietary models designed with the benefit of hindsight based on certain data (which may or may not correspond with the data that someone else would use to back-test the Index) and assumptions and estimates (not all of which may be specified herein, and which are subject to change without notice). The results obtained from different models, assumptions, estimates and/or data may be materially different from the results presented herein and such hypothetical "back-tested" information should not be considered indicative of the actual results that might be obtained from an investment or participation in a financial instrument or transaction referencing the Index. J.P. Morgan expressly disclaims any responsibility for (i) the accuracy or completeness of the models, assumptions, estimates, and data used in deriving the hypothetical "back-tested" information, (ii) any errors or omissions in computing or disseminating the hypothetical "back-tested" information, and (iii) any uses to which the hypothetical "back-tested" information may be put by any recipient of such information.

Each of the above paragraphs is severable. If the contents of any such paragraph is held to be or becomes invalid or unenforceable in any respect in any jurisdiction, it shall have no effect in that respect, but without prejudice to the remainder of this notice.

The PIMCO Balanced Index™ (the "Index") is a dynamic equity and bond index, offering exposure to U.S. equity and fixed income markets. The Index is a trademark of Pacific Investment Management Company LLC ("PIMCO") and has been licensed for use by Forethought Life Insurance Company in connection with ForeAccumulation II. The Index is the exclusive property of PIMCO and is made and compiled without regard to the needs, including, but not limited to, the suitability needs, of Forethought Life Insurance Company, ForeAccumulation II, or owners of ForeAccumulation II.
